

Phase II (Small) MS4 Annual Report Form

TPDES General Permit Number **TXR040000**

A. General Information

Authorization Number: **TXR040131**

Reporting Year (year will be either 1, 2, 3, 4, or 5): **5**

Annual Reporting Year Option Selected by MS4:

Calendar Year _____

Permit Year _____

Fiscal Year: **X** Last day of fiscal year: (**September 30th**)

Reporting period beginning date: (month/date/year) **10/01/2017**

Reporting period end date (month/date/year) **9/30/2018**

MS4 Operator Level: **2** Name of MS4: **City of Port Neches**

Contact Name: **Taylor Shelton, P.E.** Telephone Number: **(409)727-2181**

Mailing Address: **P.O. Box 758, Port Neches, TX 77651**

E-mail Address: **tshelton@ci.port-neches.tx.us**

A copy of the annual report was submitted to the TCEQ Region YES **X** NO _____
Region the annual report was submitted. TCEQ Region **10**

B. Status of Compliance with the MS4 GP and SWMP

1. Provide information on the status of complying with permit conditions: (TXR040000 Part IV Section B.2.):

| | Yes | No | Explain |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|----|---------|
| Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ. | X | | |
| Permittee is currently in compliance with recordkeeping and reporting requirements. | X | | |
| Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edwards Aquifer limitations, compliance history, etc.) | X | | |

2. Provide a general assessment of the appropriateness of the selected BMPs. You may use the table below (**See Example 1 in instructions**):

| MCM(s) | BMP | BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No, and explain.) |
|--------|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Flyers and Brochures | Yes, the distribution of flyers and brochures help educate the public on potential stormwater pollutants and provides the details on steps they can take to improve stormwater quality. |
| 1 | Develop Materials for Local Schools/Libraries | Yes, the development of materials for schools/libraries helps educate children on potential stormwater pollutants and provides the details on steps they can take to improve stormwater quality. |
| 1 | Education of Construction Site Personnel | Yes, education of construction site personnel helps bring awareness of pollutants associated with construction activities. |
| 1 | Public Service Announcements | Yes, public service announcements help educate the public on potential stormwater pollutants and provides the details on steps they can take to improve stormwater quality. |

| MCM(s) | BMP | BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No, and explain.) |
|---------------|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Storm Drain Marking | Yes, storm drain marking helps educate the public on the effects that illegal dumping/illicit discharges have on our water quality. |
| 1 | Stormwater Quality Website | Yes, the development of a stormwater quality website helps educate the public on potential stormwater pollutants and provides the details on steps they can take to improve stormwater quality. |
| 1 | Public Notice | Yes, the public notice process helps educate the public about their local stormwater management programs and gives them an opportunity to participate. |
| 1 | SWMP Availability | Yes, making the SWMP available helps educate the public on their local stormwater management program and the associated implementation schedule. |
| 1 | SWMP Committee | Yes, having a designated SWMP committee allows the SWMP to be implemented more effectively. |
| 1 | Public Meetings | Yes, public meetings help educate the public about their local stormwater management programs and gives them an opportunity to participate. |
| 1 | Stormwater Hotline | Yes, stormwater hotlines allow citizens to report illicit discharges, illegal dumping, spills, etc. for proper clean-up. |
| 1 | Clean-up Events | Yes, clean-up events provide the public with an opportunity to participate in the SWMP and help encourage the proper disposal of waste. |
| 2 | MS4 Outfall Map | Yes, developing and maintaining a MS4 outfall map makes the illicit discharge detection and elimination program more effective. |
| 2 | MS4 Outfall Inspections | Yes, inspecting MS4 outfalls helps identify and eliminate illicit discharges. |
| 2 | Regulatory Mechanisms | Yes, having regulatory mechanisms/procedures in place helps encourage individuals to comply with stormwater quality regulations. |

| MCM(s) | BMP | BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No, and explain.) |
|---------------|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2 | MS4 Field Staff Training | Yes, MS4 field staff training helps educate permittee employees on how to properly identify and eliminate stormwater pollutants. |
| 2 | IDDE Procedures | Yes, the development and implementation of IDDE procedures makes the Illicit Discharge program more effective. |
| 2 | Public Reporting | Yes, providing the public with instructions on how to properly report potential stormwater quality concerns helps identify and eliminate illicit discharges more effectively. |
| 3 | Construction Site Plan Review | Yes, reviewing construction site plans for the inclusion of appropriate structural controls helps reduce the amount of pollutants being discharged from construction sites. |
| 3 | Construction Site Inspection/Enforcement | Yes, inspecting construction sites for proper installation/maintenance of structural controls helps reduce the amount of pollutants being discharged from construction sites. |
| 3 | Regulatory Mechanisms | Yes, having regulatory mechanisms/procedures in place helps encourage individuals to comply with stormwater quality regulations. |
| 3 | Construction Site Notice Posting | Yes, posting appropriate construction site notices at permittee owned construction sites helps notify inspectors/citizens that the applicable permit coverage has been obtained and a SWPPP is being implemented to reduce pollutant discharges. |
| 3 | Public Reporting | Yes, providing the public with instructions on how to properly report potential stormwater quality concerns helps identify and eliminate illicit discharges more effectively. |
| 3 | MS4 Staff Training | Yes, MS4 staff training helps educate permittee employees on how to properly identify and eliminate stormwater pollutants. |

| MCM(s) | BMP | BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No, and explain.) |
|---------------|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 | Development Project Plan Review | Yes, reviewing development plans for the inclusion of appropriate structural controls helps reduce the amount of pollutants being discharged from construction sites. |
| 4 | Inspection of Post Construction Control Measures | Yes, inspecting post-construction control measures helps reduce the amount of pollutants being discharged from large development projects. |
| 4 | Regulatory Mechanisms | Yes, having regulatory mechanisms/procedures in place helps encourage individuals to comply with stormwater quality regulations. |
| 5 | MS4 Facility Inventory | Yes, developing an inventory of applicable MS4 facilities and conducting inspections helps reduce the amount of pollutants being discharged from permittee facilities. |
| 5 | Employee Training Program | Yes, conducting employee training helps educate permittee employees on how to properly identify and eliminate stormwater pollutants. |
| 5 | Disposal of Waste | Yes, proper disposal of waste helps reduce the amount of floatables being discharged to the storm sewer system. |
| 5 | Contractor Oversight Procedures | Yes, the development and implementation of contractor oversight procedures helps reduce the amount of pollutants being discharged by contractors performing maintenance activities on behalf of the permittee. |
| 5 | Operation and Maintenance Activities | Yes, inspecting permittee facilities helps ensure that appropriate BMPs are being implemented to reduce the amount of pollutants being discharged. |
| 5 | MS4 Structural Controls | Yes, installation and maintenance of MS4 structural controls helps reduce the amount of pollutants being discharged from permittee facilities. |
| 5 | Vehicle and Equipment Maintenance | Yes, conducting routine maintenance and repairs on permittee owned equipment helps reduce the amount of pollutants being discharged from municipal operations. |

| MCM(s) | BMP | BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No, and explain.) |
|---------------|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Litter/Garbage Collection | Yes, conducting litter/garage collection helps reduce the amount of floatables being discharged to the storm sewer system. |
| 5 | Maintain Municipally Owned Construction Sites | Yes, installing and maintaining appropriate structural controls at municipal construction sites helps reduce the amount of pollutants being discharged from permittee owned construction sites. |
| 5 | Permittee Parking Lots | Yes, inspecting permittee owned parking lots and performing maintenance helps reduce the amount of pollutants being discharged form municipally owned facilities. |

3. Describe progress towards reducing the discharge of pollutants to the maximum extent practicable. Summarize any information used (such as visual observation, amount of materials removed or prevented from entering the MS4, or if required monitoring data, etc.) to evaluate reductions in the discharge of pollutants. You may use the table (**See Example 2 in instructions**):

| MCM | BMP | Parameter | Quantity | Units | Does BMP Demonstrate a Direct Reduction in Pollutants? (Yes / No / Explain) |
|-----|------------------------------------------------|---------------------------------------------------------------------------------|--------------------------------------------------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Flyers and Brochures | estimated quantities of materials distributed or posted | 240 After the Storm brochures, 240 pet waste brochures | materials | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | Develop Materials for Local Schools/ Libraries | estimated quantities of education materials distributed | 120 stormwater coloring books | coloring books | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | Education of Construction Site Personnel | estimated quantities of educational materials or guidance documents distributed | 240 brochures/ stormwater website | materials | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | Public Service Announcements | number of PSAs | 4 PSAs on stormwater quality website | materials | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |

| | | | | | |
|---|----------------------------|--------------------------------------------------------|--------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Stormwater Quality Website | number of website updates and estimated number of hits | 1 update; 62 site visits | site visits/ updates | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | SWMP Availability | methods of making SWMP available | SWMP made available on stormwater quality website | locations | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | SWMP Committee | number of meetings held and associated sign-in sheets | 2 | sign-in sheets | No, while the BMP does not result in a direct reduction in pollution, public education is expected to indirectly reduce pollutants by increasing awareness about stormwater quality issues. |
| 1 | Stormwater Hotline | estimated number of phone calls received | 0 | phone calls | Yes, receiving and responding to phone calls concerning illicit discharges allows the permittee to make appropriate corrections to the storm sewer system. |
| 2 | MS4 Outfall Inspections | percentage of outfalls inspected | approximately 20% of the total outfalls were inspected | percentage | Yes, locating and eliminating illicit discharges represents a direct reduction in pollutants. |
| 2 | Regulatory Mechanisms | number of enforcement actions | 0 | enforcement actions | Yes, enforcement of local illicit discharge regulations represents a direct reduction in pollutants. |

| | | | | | |
|---|-------------------------------------------|---------------------------------------------------------|---------------------------------------------|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | Construction Site Plan Review | number of plans reviewed | 3 | permits | Yes, reviewing plans ensures that appropriate structural controls are being used to reduce pollution. |
| 3 | Construction Site Inspection/ Enforcement | number of construction site inspections | 10 | inspections | Yes, inspection of construction sites ensures that appropriate controls are in place and functioning properly to reduce pollution. |
| 3 | Regulatory Mechanisms | number of enforcement actions issued | 4 | enforcement actions | Yes, enforcement of local construction regulations represents a direct reduction in pollutants. |
| 3 | Construction Site Notice Posting | number of applicable permittee owned construction sites | 0 | site notices | Yes, complying with the Construction General Permit requirements on permittee owned sites helps reduce the amount of pollutants being discharged. |
| 4 | Development Project Plan Review | number of plans reviewed | 0 | plans | Yes, reviewing construction plans ensures that appropriate post construction controls are being used to reduce pollution. |
| 4 | Regulatory Mechanisms | number of enforcement actions | 0 | enforcement actions | Yes, enforcement of post construction site runoff regulations represents a direct reduction in pollution. |
| 5 | Litter/ Garbage Collection | estimated volume of litter/garbage removed | ~43,932 cubic yards litter/ garbage removed | cubic yards | Yes, conducting litter/garbage collection reduces the amount of floatables and other dumping related waste. |

| | | | | | |
|---|-----------------------------------------------|----------------------------------------------|----|------------|-----------------------------------------------------------------------------------------------------------------------------|
| 5 | Maintain Municipally Owned Construction Sites | number of permittee owned construction sites | 0 | sites | Yes, inspecting permittee owned construction sites for appropriate controls represents a direct reduction in pollution. |
| 5 | Permittee Parking Lots | number of parking lot inspections | 18 | inspection | Yes, conducting inspections of permittee owned parking lots reduces the potential of pollutants being discharged to the MS4 |

4. Provide the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals (**See Example 3 in instructions**):

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| 1 | Distribute or post at least 2 types of available brochures per year | Goal Met; developed 240 after the storm brochures and 240 pet waste brochures. |
| 1 | Ensure at least 1 type of material is distributed annually for local schools and/or public libraries | Goal Met; developed 120 stormwater coloring books and distributed at public libraries. |
| 1 | Make available to construction site personnel at least 1 guidance document, brochure, or webpage on construction site runoff issues each year | Goal Exceeded; guidance document, brochure, and webpage made available to construction site personnel. |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Provide at least 1 PSA to be aired by local media, public access channel, or website at least once per permit term | Goal Met; 4 PSAs posted on stormwater quality website. |
| 1 | Mark new storm drains developed during the permit term and maintain existing markers as needed | Goal Met; storm drains were marked during previous permit term. Additional markers are added/maintained on an as needed basis. |
| 1 | Update website at least once per permit term | Goal Met; website update was conducted on 1/18/2018. |
| 1 | Comply with state and local public notice requirements for applicable events | Goal Met; permittee adhered to public notice requirements during permit renewal process. |
| 1 | Make SWMP available to public annually | Goal Met; SWMP made available on stormwater quality website. |
| 1 | ⁽¹⁾ Conduct at least 2 SWMP Committee meetings per year ⁽²⁾ encourage local groups to participate at least once per permit term | ⁽¹⁾⁽²⁾ Goal Met; 2 SWMP committee meetings were conducted (3/21/2018; 8/08/2018). Public was invited to attend meeting during permit year 3. (8/17/2016) |
| 1 | Conduct public meeting at least once per permit term | Goal Met; public SWMP meeting was conducted during permit year 3. (8/17/2016) |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Distribute at least 2 types of materials per year that informs the public about reporting stormwater quality concerns | Goal Met; 2 types of brochures and stormwater quality website were made available. |
| 1 | Conduct at least 1 clean-up event per permit term and encourage public participation | Goal Met; one clean-up event was held and approximately 500 cubic yards of litter/garbage was collected. |
| 2 | Conduct 1 review of the map per permit term. Map outfalls in new development areas on an as needed basis | Goal Met; map review was conducted on 5/08/2018. 2 new outfalls were identified during the reporting period. |
| 2 | Inspect approximately 20% of the identified outfalls per year | Goal Met; 32 outfalls out of 160 were inspected (20%). |
| 2 | ⁽¹⁾ Enforce the local illicit discharge regulations as needed ⁽²⁾ Review and revise existing regulatory mechanisms within 2 years of permit effective date; if necessary | ⁽¹⁾⁽²⁾ Goal Met; a local stormwater quality ordinance has been developed/revise as required and is enforced on an as needed basis. 0 enforcement actions were issued for illicit discharges during the reporting period. |
| 2 | Conduct training for MS4 field staff at least once per permit term | Goal Met; MS4 field staff training has been conducted during the current permit term. |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2 | Develop and maintain appropriate IDDE procedures | Goal Met; zero illicit discharges were identified during the reporting period, however standard operation procedures are in place for reporting/eliminating illicit discharges. |
| 2 | Distribute at least 2 types of media/materials to help facilitate public reporting of illicit discharges | Goal Met; 2 types of brochures and stormwater quality website were made available. |
| 3 | Review applicable construction site plans for compliance with local regulatory mechanisms | Goal Met; 3 stormwater permits were issued this reporting period. |
| 3 | Inspect 50% of applicable construction sites per year, or a minimum of 30 inspections | Goal Met; 100% of the applicable sites were inspected during the reporting period. (a total of 10 inspections were performed on the 3 applicable sites) |
| 3 | (1)Enforce local construction regulations as needed (2)Review and revise existing regulatory mechanisms within 2 years of permit effective date; if necessary | (1)(2) Goal Met; a local stormwater quality ordinance has been developed/revise as required and is enforced on an as needed basis. (4) 48-hour notices were issued regarding construction regulations during the reporting period. |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | Post an appropriate site notice at each permittee owned construction site subject to the TPDES Construction General Permit TXR150000 | Goal Met; no permittee owned construction projects were subject to the TPDES Construction General Permit during the reporting period. |
| 3 | Develop procedures for receipt and consideration of information submitted by the public | Goal Met; procedures for receipt and consideration of information submitted by the public have been developed and are currently being implemented. |
| 3 | Conduct training for MS4 field staff at least once per permit term | Goal Met; MS4 field staff training has been conducted during the current permit term. |
| 4 | Review construction plans for the inclusion of appropriate post-construction controls | Goal Met; the permittee did not receive any applicable construction plans during the reporting period. |
| 4 | Conduct at least 1 inspection of control measures per permit term | Goal Met; 1 permittee owned control measure was inspected during the current permit term. |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 | (1)Enforce the local post construction site runoff regulations (2)Review and revise existing regulatory mechanisms within 2 years of permit effective date; if necessary | (1)(2) Goal Met; a local stormwater quality ordinance has been developed/revise as required and is enforced on an as needed basis. 0 enforcement actions were issued for post construction regulations during the reporting period. |
| 5 | Develop and maintain MS4 facility inventory list and stormwater controls within the regulated area | Goal Met; MS4 facility inventory has been developed along with the standard operating procedures. |
| 5 | Conduct at least 1 training session per permit term | Goal Met; employee training has been conducted during the current permit term. |
| 5 | Properly dispose of waste materials on a routine basis and maintain documentation regarding disposal procedures | Goal Met; approximately 43,932 cubic yards of litter/garbage was removed and properly disposed of. |
| 5 | Develop contractor oversight procedures and conduct a review of the procedures once per permit term | Goal Met; contractor oversight procedures have been developed and are currently being implemented. |

| MCM(s) | Measurable Goal(s) | Explain progress toward goal or how goal was achieved If goal was not accomplished please explain |
|---------------|-------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Inspect municipal facilities at least once per permit term | Goal Met; 3 facility inspections have been conducted during the current permit term. |
| 5 | Inspect structural controls at least once per year | Goal Met; no permanent structural controls are owned by the permittee. |
| 5 | Conduct routine maintenance and repairs on permittee owned equipment | Goal Met; the permittee owns 87 vehicles/equipment and conducts routine maintenance and repairs on an as needed basis. |
| 5 | Conduct litter/garbage collection at least once per year within the regulated area | Goal Met; approximately 43,932 cubic yards of litter/garbage was removed and properly disposed of. |
| 5 | Inspect and maintain permittee owned construction sites as required by the TCEQ Construction General Permit | Goal Met; no permittee owned construction projects were subject to the TPDES Construction General Permit during the reporting period. |
| 5 | Inspect/maintain permittee parking areas at least once per year | Goal Met; 18 parking lot inspections were conducted during the reporting period. |

C. Stormwater Data Summary

Provide a summary of all information used including any lab results (if sampling was conducted) to assess the success of the SWMP at reducing the discharge of pollutants to the MEP. For example, did the MS4 conduct visual inspections, clean the inlets, look for illicit discharge, clean streets, look for flow during dry weather, etc.? (Refer to the MS4 General Permit TXR040000 Part IV Section B.2.(b))

During the reporting period, the permittee conducted multiple activities to help reduce the discharge of pollutants to the MEP, including but not limited to: outfall inspections, public education, construction site inspections, litter/garbage collection, and parking lot inspections. As a result, the permittee inspected approximately 20% of their MS4, conducted 10 construction site inspections, and collected/properly disposed of approximately 43,932 cubic yards of litter/garbage (data for all BMPs implemented during the reporting period to reduce the discharge of pollutants to the MEP is included in Section B.3 of this annual report). After review, the permittee has maintained 100% compliance with the measurable goals and implementation schedule established in their SWMP and believes that the program has been successful at reducing the discharge of pollutants to the MEP.

D. Impaired Waterbodies

1. If applicable, explain below any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4's BMPs used to address the pollutant of concern: (Refer to MS4 General Permit TXR040000 Part IV Section B.2.(c))

The permittee has referred to the CWA 303(d) list and determined that they are a potential source of the pollutant(s) of concern (with the exception of PCBs in edible tissue) being discharged to Alligator Bayou (stream segment No. 0702A) and Neches River Tidal (stream segment No. 0601). Appropriate focused BMPs and corresponding measurable goals have been developed to reduce the discharge of the pollutant(s) of concern that contribute to the impairment of the water body. The focused BMPs include activities related to sanitary sewer systems, on-site sewer facilities, illicit discharges/dumping, public reporting, and residential education programs.

Our research indicates that PCBs in edible tissue is a legacy pollutant and the permittee is not considered a potential source. Therefore, no additional focused BMPs were developed to target that pollutant.

2. Describe the implementation of targeted controls if the small MS4 discharges to an impaired water body with an approved TMDL (Refer to the MS4 General permit TXR040000; Part II Section D.4.(a)):

N/A; permittee does not discharge to a water body with an approved TMDL

3. Report the benchmark identified by the MS4 and assessment activities (Refer to the MS4 General permit TXR040000; Part II Section D.4.(a)(6)): **N/A; only applies to water bodies with an approved TMDL**

| Benchmark Parameter <i>(Ex: Total Suspended Solids)</i> | Benchmark Value | Description of additional sampling or other assessment activities | Year(s) conducted |
|-------------------------------------------------------------------|------------------------|--------------------------------------------------------------------------|--------------------------|
| <u>N/A</u> | <u>N/A</u> | <u>N/A</u> | <u>N/A</u> |

4. Provide an analysis of how the selected BMPs will be effective in contributing to achieving the benchmark (Refer to the MS4 General permit TXR040000; Part II Section D.4.(a)(4)): **N/A; only applies to water bodies with an approved TMDL**

| Benchmark Parameter | Selected BMP | Contribution to achieving Benchmark |
|----------------------------|---------------------|--------------------------------------------|
| <u>N/A</u> | <u>N/A</u> | <u>N/A</u> |

5. If applicable, report on focused BMPs to address impairment for bacteria (Refer to the MS4 General Permit TXR040000; Part II Section D.4.(a)(5)):

| Description of bacteria-focused BMP | Comments/Discussion |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Sanitary Sewer Overflow (SSO) Plans: Comply with existing and/or newly approved SSO plans for municipalities operating sanitary sewer systems, if applicable.</p> | <p>1 applicable sanitary sewer overflow plan has been developed and is being implemented.</p> |
| <p>Sanitary Sewer Capital Improvement Projects: Document and report on sanitary sewer system capital improvement projects that result in the reduction of sanitary sewer overflows and/or reduction in the magnitude of stormwater inflow and infiltration into the sanitary sewer system.</p> | <p>0 sanitary sewer capital improvement projects took place during the reporting period.</p> |
| <p>Failing On-Site Sewer Systems: Identification of failing on-site sewer systems through complaints and/or visual inspections of the storm sewer system. Identified discharges from failing on-site sewer systems will be addressed as illicit discharges to the MS4 through the operator's legal authority.</p> | <p>0 illicit discharges were found as a result of failing on-site sewer systems.</p> |
| <p>Promote Proper Maintenance of On-Site Sewer Systems: Develop media to facilitate proper maintenance of on-site sewer systems. Educational materials may include brochures, websites, and/or social media pages.</p> | <p>2 types of brochures and a stormwater quality website that help facilitate proper maintenance of on-site sewer systems were developed and made available during the reporting period.</p> |
| <p>MS4 Outfall Inspections: Utilize reports from MS4 field staff, citizens, and a concentrated dry weather screening program to inspect outfalls for illicit discharges.</p> | <p>32 outfalls out of 160 were inspected (20%).</p> |

6. Assess the progress to determine BMP's effectiveness in achieving the benchmark (Refer to the MS4 General Permit TXR040000; Part II.D.4.(a)(6)):

N/A; only applies to water bodies with an approved TMDL.

| Benchmark Indicator | Description/Comments |
|---------------------|----------------------|
| N/A | N/A |

E. Stormwater Activities

Describe stormwater activities the MS4 operator plans to undertake during the next reporting year. You may use the table below (Refer to the MS4 General Permit TXR040000 Part IV Section B.2.(d)):

| MCM(s) | BMP | Stormwater Activity | Description/Comments |
|--------|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Flyers and Brochures | Distribute or post at least 2 types of available brochures per year | Distribution or posting of flyers and brochures for the purpose of educating the public on stormwater impacts and ways they can minimize stormwater pollution |
| 1 | Develop Materials for Local Schools/Libraries | Ensure at least 1 type of material is distributed annually for local schools and/or public libraries | Development of educational materials for school age children in order to foster an early age respect for water quality |
| 1 | Education of Construction Site Personnel | Make available to construction site personnel at least 1 guidance document, brochure, or webpage on construction site runoff issues each year | Development of guidance materials/brochures/webpage for construction site personnel on the proper installation and maintenance of erosion and sediment controls, and other construction site runoff issues |

| MCM(s) | BMP | Stormwater Activity | Description/Comments |
|---------------|------------------------------|----------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Public Service Announcements | Provide at least 1 PSA to be aired by local media, public access channel, or website at least once per permit term | Develop and make available PSAs on the impacts of stormwater pollution and steps that residents can take to improve water quality |
| 1 | Storm Drain Marking | Mark new storm drains developed during the permit term and maintain existing markers as needed | Paint or epoxy storm drain markers on permanent stormwater inlets in new developments |
| 1 | Stormwater Quality Website | Update website at least once per permit term | Develop and maintain a stormwater quality website. The website will include stormwater education per the TCEQ general permit guidelines and provide specific information regarding the TPDES Phase II MS4 program; including links to other local, state and national stormwater websites. In addition, the website will provide viewers with instructions on how to report stormwater quality concerns in their area. |
| 1 | SWMP Availability | Make SWMP available to the public annually | Make the SWMP available to the public on the stormwater quality website. Website address will be included on flyers and brochures distributed by the permittee. |
| 1 | SWMP Committee | Conduct at least 2 SWMP Committee meeting per year and encourage local groups to participate at least once per permit term | Formation/maintenance of a committee on SWMP program development and implementation |

| MCM(s) | BMP | Stormwater Activity | Description/Comments |
|---------------|------------------------------------------|---------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Stormwater Hotline | Distribute at least 2 types of materials per year that informs the public about report stormwater quality concerns. | Advertise appropriate phone numbers for citizens to report information regarding illicit discharges, illegal dumping, construction site discharges, etc. |
| 2 | MS4 Outfall Inspections | Inspect approximately 20% of the identified outfalls per year | Utilize reports from MS4 field staff, citizens, and a concentrated dry weather screening program to inspect outfalls for illicit discharges |
| 2 | Regulatory Mechanisms | Enforce the local illicit discharge regulations as needed | Enforce local illicit discharge regulations prohibiting illicit non-storm water discharges from being discharged into the MS4. |
| 2 | Public Reporting | Distribute at least 2 types of media/materials to help facilitate public reporting of illicit discharges | Develop media to facilitate public reporting of illicit discharges. Options may include stormwater hotlines, websites, and social media pages. |
| 3 | Construction Site Plan Review | Review applicable construction site plans for compliance with local regulatory mechanisms | Implement a construction site plan review program that focuses on compliance with the local construction regulations and water quality impacts and develop associated guidance materials |
| 3 | Construction Site Inspection/Enforcement | Inspect 50% of applicable construction sites per year, or a minimum of 30 inspections | Conduct inspections of construction sites/associated control measures and enforce local regulatory mechanisms to the MEP. Notify site operators of their requirement to obtain TPDES permit coverage. |

| MCM(s) | BMP | Stormwater Activity | Description / Comments |
|--------|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | Regulatory Mechanisms | Enforce local construction regulations as needed. | Enforce local stormwater runoff control regulations to address stormwater runoff from construction sites which disturb one acre or more or are part of a common plan of development that disturb greater than or equal to one acre. |
| 3 | Construction Site Notice Posting | Post an appropriate site notice at each permittee owned construction site subject to the TPDES Construction General Permit TXR150000 | Post an appropriate site notice or NOI in a publicly accessible location for each permittee owned construction project subject to the TCEQ Construction General Permit |
| 3 | Public Reporting | Develop and implement procedures for receipt and consideration of information submitted by the public regarding construction site stormwater runoff. | Implement standard operating procedures for public reporting regarding construction site stormwater runoff. SOP was developed in Year 2 (2015). |
| 4 | Development Project Plan Review | Review construction plans for the inclusion of appropriate post-construction controls | Review development plans to ensure compliance with permittee post-construction runoff guidelines and inclusion of appropriate permanent stormwater quality controls. Ensure that operators design, install, implement, and maintain a combination of structural and non-structural BMPs appropriate for the community and that protects water quality. |

| MCM(s) | BMP | Stormwater Activity | Description/Comments |
|---------------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 | Regulatory Mechanisms | Enforce the local post construction site runoff regulations | Enforce local post construction stormwater management regulations to address discharges from new development and redevelopment projects which disturb one acre or more or are part of a common plan of development that disturb greater than or equal to one acre. Document and maintain all associated enforcement actions. |
| 5 | MS4 Facility Inventory | Develop and maintain MS4 facility inventory list and stormwater controls within the regulated area | Maintain an inventory of the applicable MS4's facilities and stormwater controls within the regulated area |
| 5 | Disposal of Waste | Properly dispose of waste materials on a routine basis and maintain documentation regarding disposal procedures | Properly dispose of waste materials that are removed as a result of maintenance activities; such as floatables, dredge spoils, and or accumulated sediments |
| 5 | Vehicle and Equipment Maintenance | Conduct routine maintenance and repairs on permittee owned equipment | Conduct routine maintenance of permittee owned vehicles according to manufacturer's specifications |
| 5 | Litter/Garbage Collection | Conduct litter/garbage collection at least once per year within the regulated area | Conduct garbage and/or litter collection in order to reduce floatable material discharges to stormwater |

| MCM(s) | BMP | Stormwater Activity | Description/Comments |
|---------------|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5 | Maintain Municipally Owned Construction Sites | Inspect and maintain permittee owned construction sites as required by the TCEQ Construction General Permit | Conduct maintenance activities necessary to properly maintain erosion and sediment controls at municipally owned construction sites based on needs identified during construction site inspections |
| 5 | Permittee Parking Lots | Inspect/maintain permittee parking areas at least once per year | Inspect and maintain municipal parking lots |

F. SWMP Modifications

1. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ's review.
 ___ Yes **X** No

If 'Yes', report on changes made to measurable goals and BMPs (Refer to the MS4 General Permit TXR040000 Part IV Section B.2.(e)): **N/A**

| MCM(s) | Measurable Goal(s) or BMP(s) | Implemented or Proposed Changes (Submit NOC as needed) |
|---------------|-------------------------------------|---------------------------------------------------------------|
| N/A | N/A | N/A |

Note: If changes include additions or substitutions of BMPs, include a written analysis explaining why the original BMP is ineffective or not feasible and why the replacement BMP is expected to achieve the goals of the original BMP.

2. Explain additional changes or proposed changes not previously mentioned (i.e. dates, contacts, procedures, annexation of land etc.): **N/A**

G. Additional BMPs for TMDLs and I-Plans

Provide a description and schedule for implementation of additional BMPs that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans (Refer to the MS4 General permit TXR040000 Part IV Section B.2.(f)). N/A

| BMP | Description | Implementation Schedule (Start Date etc.) | Status / Completion Date (completed, in progress, not started) |
|------------|--------------------|--------------------------------------------------|-----------------------------------------------------------------------|
| <u>N/A</u> | <u>N/A</u> | <u>N/A</u> | <u>N/A</u> |

H. Additional Information

1. Is the permittee relying on another entity to satisfy some of its permit obligations? (refer to the MS4 General Permit TXR040000 Part IV Section B.2.(g))

Yes No

If 'Yes,' provide the name(s) of other entities and an explanation of their responsibilities (add more spaces or pages if needed):

Name and Explanation: City of Groves; see explanation below

Name and Explanation: City of Nederland; see explanation below

Name and Explanation: City of Port Arthur; see explanation below

Name and Explanation: Jefferson County Drainage District No. 7; see explanation below

Name and Explanation: Jefferson County; see explanation below

The permittee is a participating member in the Jefferson County Stormwater Quality Coalition and is responsible for the implementation of their SWMP in its entirety. However, some of the activities are being conducted as a group, such as the development of public education materials, guidance documents, standard operating procedures, and SWMP meetings.

- 2.a. Is the permittee part of a group sharing a SWMP with other entities?

Yes No

2.b. If 'yes,' is this a system-wide annual report including information for all permittees? N/A

Yes No

I. Construction Activities

1. The number of construction activities that occurred in the jurisdictional area of the MS4 (Notices of intent and site notices received; Refer to the MS4 General Permit TXR040000 Part IV Section B.2.(h)) 3

2a. Does the permittee utilize the optional 7th MCM related to construction?

Yes No

2b. If 'yes,' then provide the following information for this permit year (refer to the MS4 General Permit TXR040000 Part IV Section B.2.(i)):

| | |
|--------------------------------------------------------------------------------------|-----|
| The number of municipal construction activities authorized under this general permit | N/A |
| The total number of acres disturbed for municipal construction projects | N/A |

Note: Though the seventh MCM is optional, implementation must be requested on the NOI or on a NOC and approved by the TCEQ.

J. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name (printed): André Wimer Title: City Manager
Signature:  Date: 11-26-18

Note: If this is this a system-wide annual report including information for all permittees, each permittee shall sign and certify the annual report in accordance with 30 TAC §305.128 (relating to Signatories to Reports).
